DRIVEN BY PERFORMANCE. DEFINED BY SAFETY.

The Mitsubishi Triton is built to perform with its Beast Mode capabilities. It is engineered with the perfect balance of power, control and bold aesthetics. The Triton redefines the pickup driving experience with SUV-inspired comfort, unmatched durability, while dominating all terrains with best-in-class handling.

With over two decades of trust on Malaysian roads, the Triton's legacy is built on relentless reliability and proven durability. From daily commutes to conquering the grueling Asia Cross Country Rally, it has earned its reputation through real-world endurance and motorsport success.

More than just a pickup, the Triton is the driving force for those who power their ambitions.

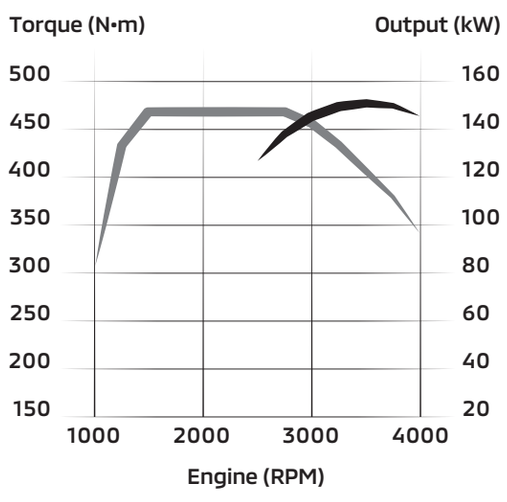

TO EXTRAORDINARY AND BEYOND

The new, advanced, Hyperpower Engine.

HYPERPOWER ENGINE*

With its combination of brains and brawn, the Mitsubishi Triton doesn't just transport you; it powers you to extraordinary and beyond. This is a truck that redefines the very essence of exploration, proving once and for all that the path less travelled is indeed the path worth taking.

204 PS MAX POWER | **470 NM** MAX TORQUE

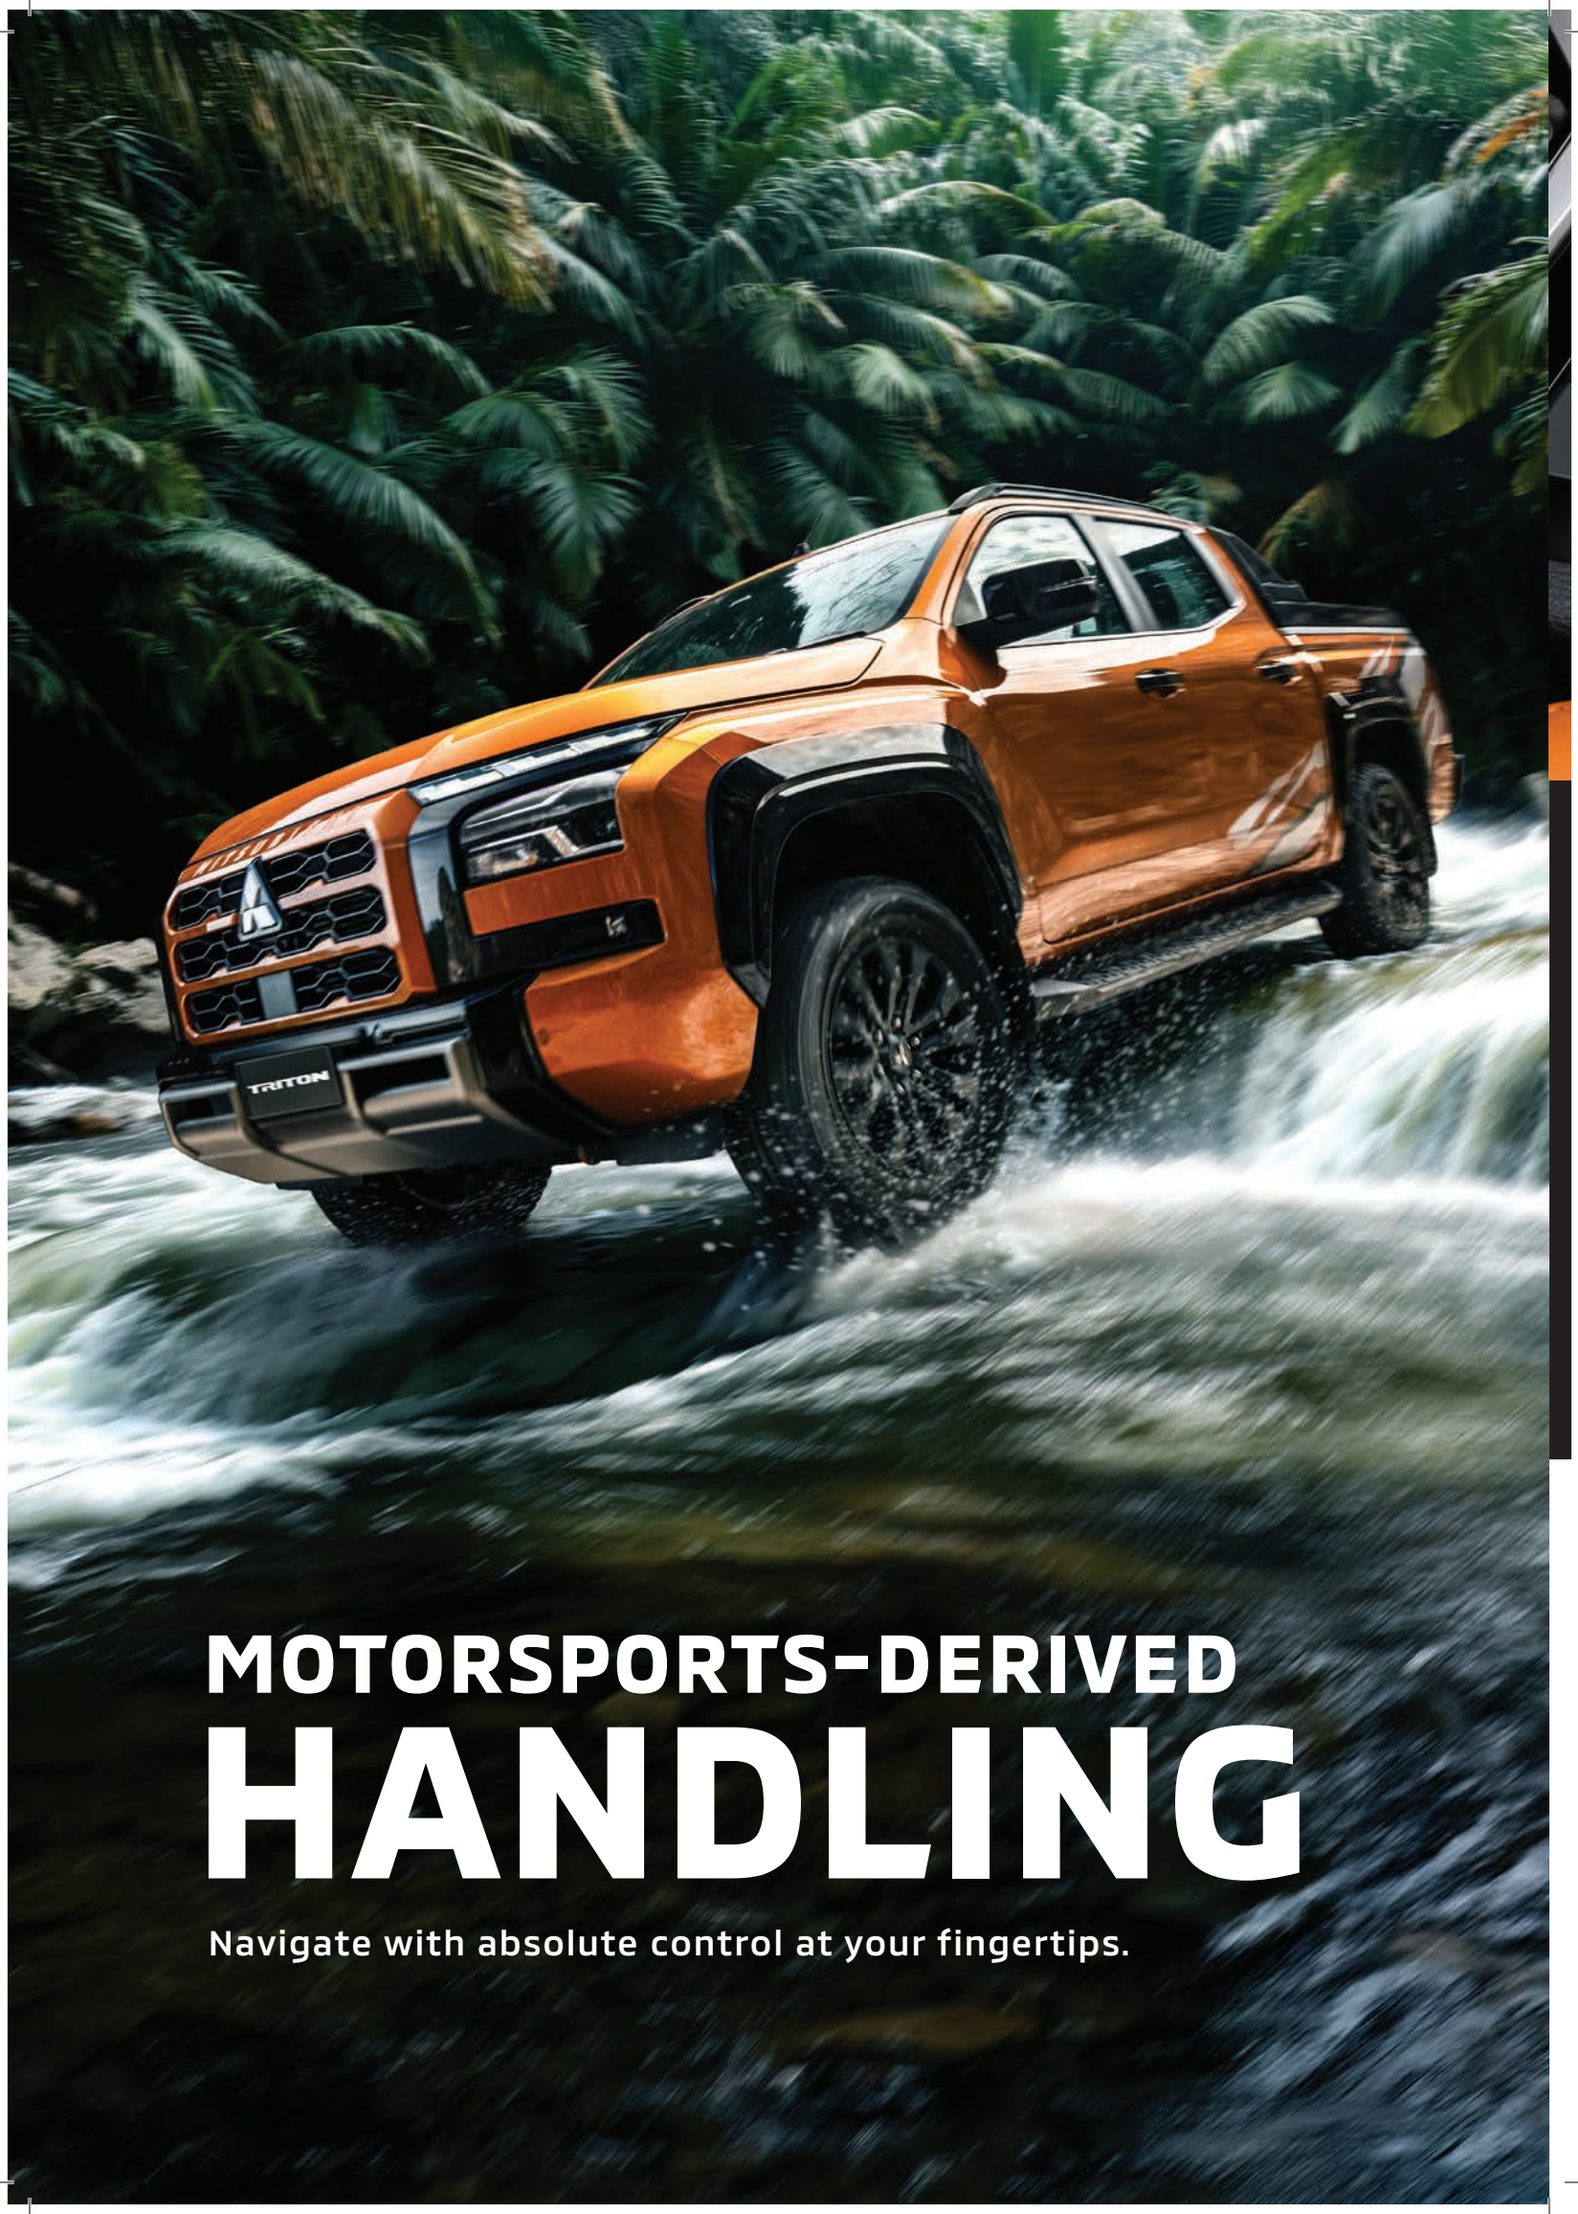

PERFORMANCE DRIVEN

The Mitsubishi Triton features advanced two-stage turbocharging technology. The first stage utilizes a smaller, High-Pressure Turbo ensuring quick air intake at low RPMs for responsiveness. The second stage activates via a larger, Low-Pressure Turbo, which takes over at higher RPMs, boosting power output, while maintaining fuel efficiency.

MOTORSPORTS-DERIVED HANDLING

Navigate with absolute control at your fingertips.

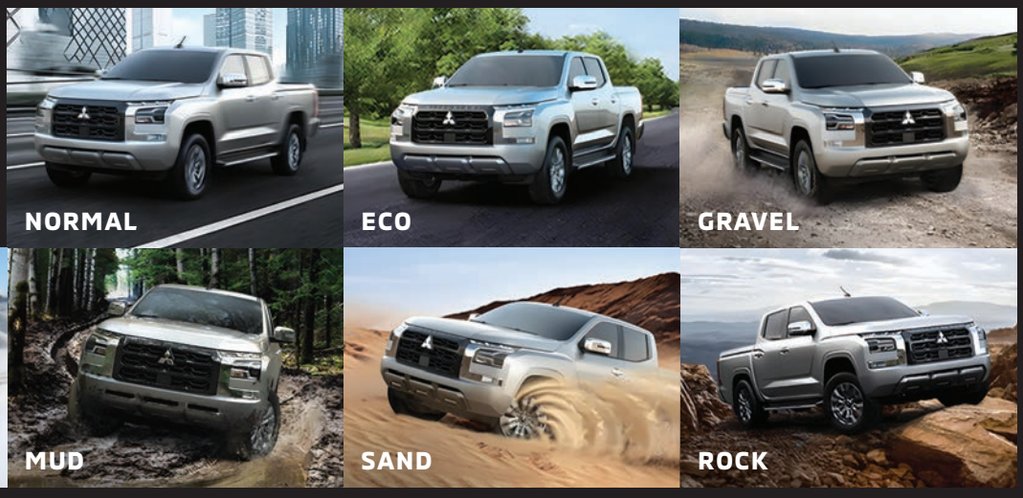

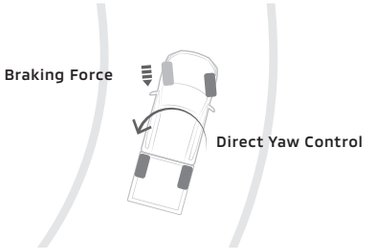

SUPER SELECT 4WD-II*

Mitsubishi Motors' one and only Super Select 4WD-II system provides exceptional all-terrain performance with its four selectable modes, including 4H (full-time 4WD) that delivers great stability even on wet surfaces, and outstanding cornering performance even on dry pavement.

C/D LOCK **2H** 2WD	C/D LOCK **4H** Full-time 4WD
C/D LOCK **4HLc** Centre Diff Locked 4WD	4L C/D LOCK **4LLc** Low Gear Centre Diff Locked 4WD

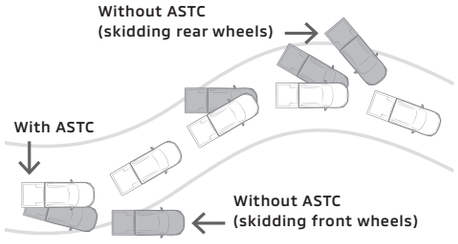

7 DRIVE MODES

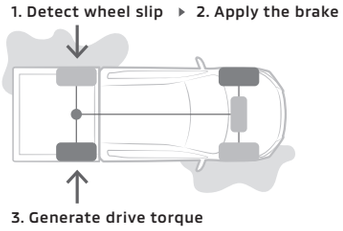

Active Yaw Control [AYC]*

The AYC system helps you precisely handle slippery roads, turning the car just as you want – an exciting driving experience for those who enjoy sporty or off-road driving.

Active Stability and Traction Control [ASTC]

ASTC applies brake force whilst cornering to maintain vehicle stability and optimise traction to prevent torque loss. The system adjusts engine output and applies brake force to spinning wheels as needed.

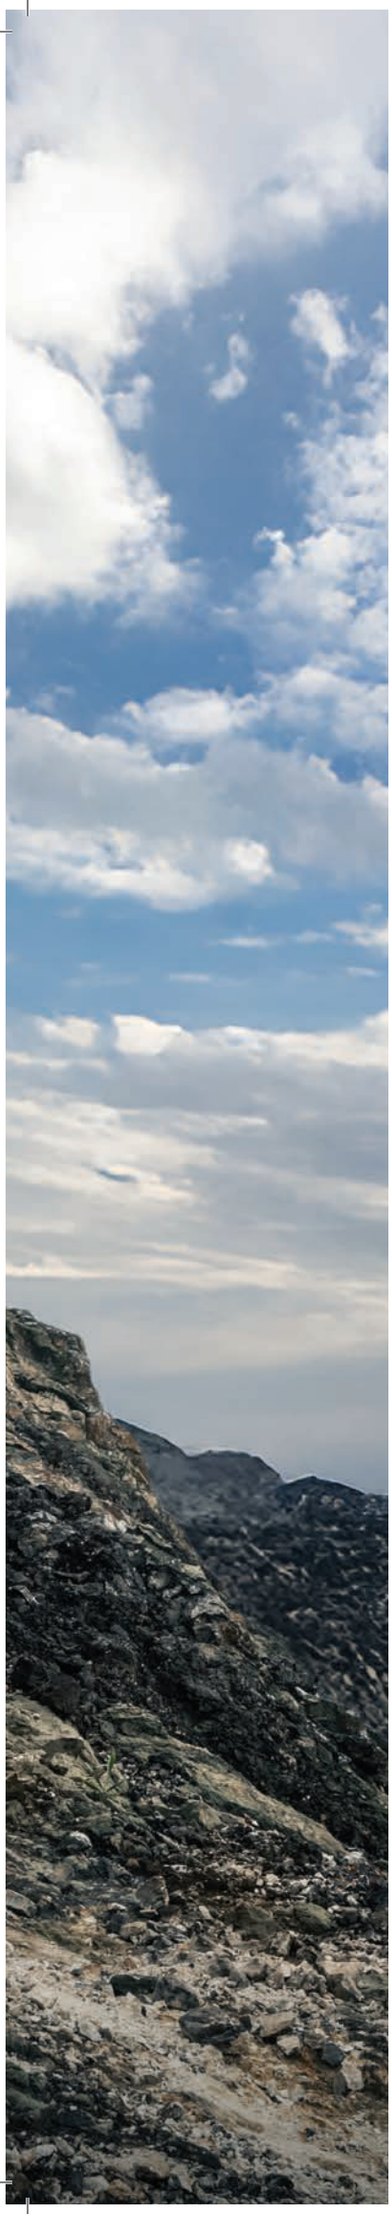

Active Limited Slip Differential [Brake Control Type]

Helps prevent wheel spin on slippery roads by applying brake force to spinning wheels, ensuring better control and road grip.

JUST ADD VENTURES

For business, leisure and everything in between.

Double CAB

ENLARGED CARGO BED

Easily carry all your essentials, including an Euro Pallet, with the versatile cargo bed. It's designed to handle everything you need, and more.

NEW FRAME CHASSIS

Mitsubishi's chassis frames are rigorously tested and proven in the harshest terrains. Built with high-tensile materials, it is designed to withstand the toughest terrain and ensure reliable performance in any condition. This rigid frame is the foundation upon which the Triton's outstanding on/off-road performance and ride comfort is engineered.

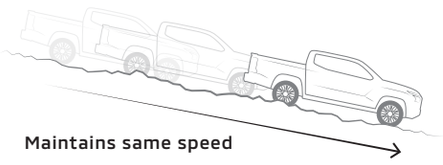

3,500KG TOWING CAPACITY

The Triton now has a towing capacity of up to 3,500kg. This is further enhanced with Trailer Stability Assist, which helps prevent 'trailer swing' by controlling individual wheel slip to settle the trailer when it detects the trailer starting to oscillate at speed.

HILL DESCENT CONTROL [HDC]**

HDC applies brakes and maintains speed when travelling downhill, for safer steering without manual brake application. The system activates at 2-20 km/h in automatic, and in 1st gear at 3-20 km/h in manual vehicles.

Maintains same speed

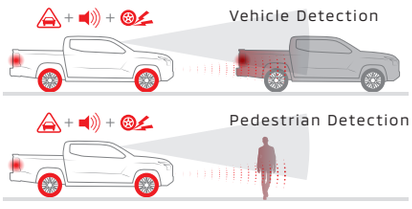

COMMAND & CONQUER

Power to go anywhere.
Advancements to go the distance.

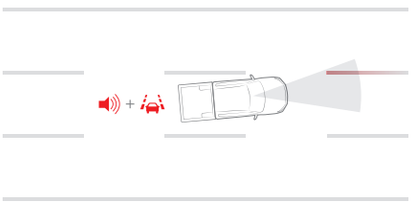

MITSUBISHI MOTORS SAFETY SENSING [MMSS]

The Mitsubishi Triton features a comprehensive suite of safety systems, instilling every journey with peace of mind.

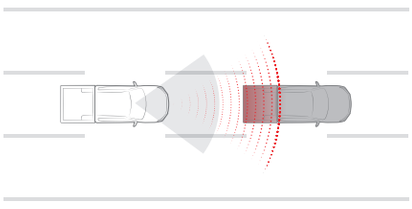

Forward Collision Mitigation system [FCM]**

FCM can help detect vehicles and pedestrians and alert the driver with audio and visual warnings, as well as apply the brakes to avoid or reduce potential collisions.

Lane Departure Warning [LDW]**

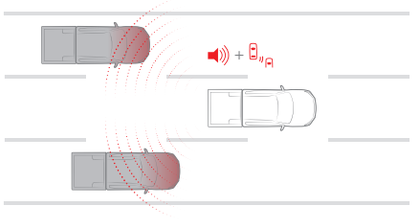

LDW warns the driver with visual and audible alerts when the vehicle unintentionally crosses lane markings at speeds over 65km/h, using a windshield-mounted camera.

Adaptive Cruise Control [ACC]*

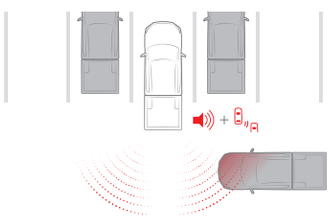

ACC uses advanced radar and camera technology to judge the distance to the vehicle ahead and automatically adjusts the Triton's speed to maintain the set driving distance.

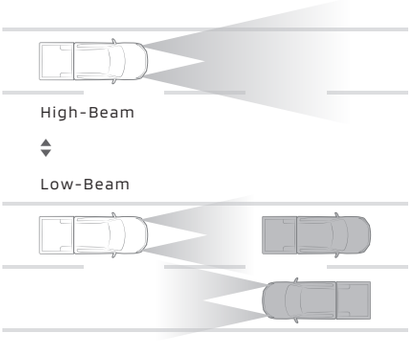

Blind Spot Warning [BSW] with Lane Change Assist [LCA]**

Rear bumper radar sensors detect vehicles in blind spots on both sides. If a vehicle is detected whilst the turn signal is on, an indicator blinks in the corresponding side mirror and a buzzer sounds.

Rear Cross Traffic Alert [RCTA]**

When reversing, if radar sensors detect a moving vehicle, the system warns through visual, audible, and side mirror alerts, helping to enhance safety and prevent potential collisions.

Automatic High-Beam [AHB]**

Automatically switches headlights between low and high beam based on the presence of a vehicle ahead for safer and more comfortable night-time driving.

Note: The radar wave graphics are for illustrative purposes only and do not represent the actual sensor application. Drivers are fully responsible for their own safe driving. Please drive safely and do not rely solely on these systems whilst driving. Some equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.

SUV-INSPIRED INTERIOR COMFORTS

The Mitsubishi Triton brings together the renowned robustness of a Mitsubishi truck, with the refinements of a premium SUV. This new generation interior is designed with sophisticated aesthetics and tactile quality, with high levels of convenience and utility as well.
